

# Full Height Installation Instructions

## Step 1

Unwrap and separate Cavity, Head Piece and Closing Jamb.

## Step 2

Attach Head Piece to the Cavity and the Closing Jamb and fix to studs.

## Step 3

Align the Cavity to the wall line and fix through metal base plate.  
\* Note: Due to the variety of floor types, plate fixings are not supplied.

## Step 4

Fix the hanger plate to the top of the door as per the diagram at right.

## Step 5

Unscrew 110mm piece of track.

## Step 6

If you have requested a 'T' Guide, fix to floor and insert a groove 20mm deep and 5mm wide into the base of your door.

## Step 7

Make sure that the door fits.

1. Insert the back hanger into the track
2. Slide along the Track
3. Insert the Front Hanger
4. Make sure the door moves freely and goes into the pocket.  
\* Note: At this time the door can be removed whilst the linings and finishing touches are made. Door can be refitted at a later time and the remaining steps can be completed.

## Step 8

With the door fitted, re-attach the 110mm piece of Track and screw in place.

## Step 9

Tighten the Screws in the exposed end of the track.  
\* Note: Do not tighten the screws concealed in the pocket.

## Step 10

Adjust the Hangers so the door closes flush against the Closing Jamb without any gaps.

## Step 11

If using a standard Door Guide, fit to Split Jambs and adjust for smooth operation.
