

# Product Datasheet

## Description

Alubase™ is a natural anodised slimline aluminium skirting section designed for quick and easy finishing of plaster walls in commercial, industrial and residential applications. The SK100 is adhesive fixed skirting that provides a flat and minimal look finishing off walls at floor level.

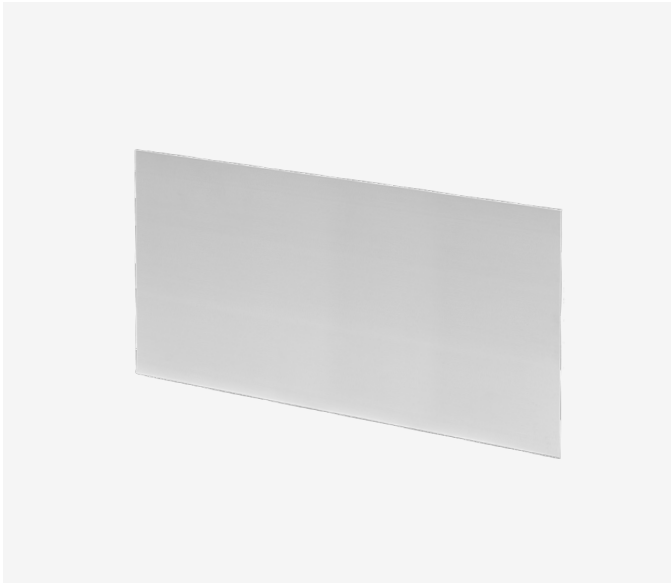

## Dynamic Characteristics

Alubase™ aluminium skirting is manufactured to the Australian Standards: AS1866 Aluminum and Aluminum Alloys – Extruded Rod, Bar, Solid and Hollow Shapes. Alubase skirting is manufactured from 1.6mm Natural anodized aluminium.

## Installation Method

After fixing wallboard to stud wall, the Alubase skirting should be fixed to the base of the plasterboard wall with an appropriate construction adhesive.

## Installation
